

Puppy Health Care Plan

According to the AAHA Veterinary Guidelines puppies should have a distemper parvo vaccine every 2-4 weeks until it is at least 16 weeks of age. Dogs residing in a HIGH-RISK environment or HIGH-RISK breeds may benefit from receiving a final dose at 18 to 20 weeks of age.

1st Puppy Visit (7-8 Weeks of Age)

Physical Exam	\$50.00	
DHPP Vaccination #1	\$20.00	Total - \$115 - \$125
Fecal # 1	\$30.00	
Deworming #1 - Depends on pet weight	\$15.00 - \$25.00	
<i>(If fecal is positive the deworming meds will be an additional cost depending on weight and the type of worms your pet may have. The doctors like to have 2 negative fecals on file to ensure your pet does not have parasites)</i>		

2nd Puppy Visit (9-11 Weeks of Age)

Physical Exam	\$50.00	
DHPP Vaccination #2	\$20.00	Total - \$105 - \$115
Bordetella	\$20.00	
Deworming #2 - Depends on pet weight	\$15.00 - \$25.00	

3rd Puppy Visit (12-14 Weeks of Age)

Physical Exam	\$50.00	
DHPP Vaccination #3	\$20.00	Total - \$122
Lepto # 1	\$22.00	
Fecal # 2	\$30.00	

At this appointment your pet is old enough to receive the Leptospirosis vaccine. Leptospirosis is a bacterial disease that is spread through the urine of infected wildlife. It is also zoonotic meaning that your pet can spread it to you.

4th Puppy Visit (16-17 weeks)

Physical Exam	\$50.00	
DHPP Vaccination #4	\$20.00	Total - \$147
Lepto # 2	\$22.00	
Lyme #1	\$38.00	
Rabies 1yr.	\$17.00	

At this appointment we would introduce the Lyme vaccine. Lyme is transmitted to dogs through the bite of a tick. Lyme disease can cause generalized pain, high fevers, lethargy, vomiting, and weight loss.

5th Puppy Visit (19-20 weeks)

Lyme #2 (Tech visit without doctor)	\$38.00	Total - \$38.00
-------------------------------------	---------	------------------------

PREVENTION:

- Heartworm prevention should be given monthly (year-round) for the life of your dog. Prevention should be given to all dogs regardless of whether they are inside all day or not, mosquitos can still come into your house! North Carolina does not get cold enough for the mosquito population to die off during the winter months, so they are still at risk during the winter. We recommend Heartgard Plus, Interceptor Plus, or Simprica Trio.
- We also recommend ORAL monthly flea/tick prevention year-round, especially if you live in a heavily populated area. We do not recommend topical flea/tick prevention.
